

INSTRUCTIONS FOR CASTING REMOVAL

NOTE: Always break casting free from structure before lifting.

1. Hook up GRAPPLER to truck crane, or other lifting source.

2. Center and lower GRAPPLER over casting.

3. While lowering GRAPPLER, arms fold into casting and set. Before lifting, make sure GRAPPLER is level and teeth have a secure hold.

4. Keeping hands and feet away, casting can now be safely and easily removed or set in place.
